HERRCO – Hellenic Recovery Recycling Corporation (Greece)

General information

The **Hellenic Recovery Recycling Corporation (HERRCO)** is the result of an initiative taken among Greek companies active in packaging production and the trading of packaged goods, aiming to meet effectively their legal obligation for the recycling of packaging waste deriving from their products through the administration of their funds, within the framework of the National and European legislation. To respond to the above requirements, HERRCO has developed and implemented in Greece the Collective Alternative Management System – RECYCLING (CAMS – RECYCLING) by applying 6-year Operational Plans as approved by the competent authorities.

HERRCO is a non-profit organization that constitutes an exceptionally successful example of collaboration among local packaging producers placing their products in the Greek market, packaging importers and Local Authorities, that are legally bound for the collection of municipal waste.

The company currently owns 10 Materials Recovery Facilities and is also responsible for the monitoring and coordination of the activities of other 22 owned by third parties.

Offering

The company is interested in participating in projects proposals that will be submitted under the call LIFE-2022-SAP-ENV-ENVIRONMENT — Circular Economy, resources from Waste, Air, Water, Soil, Noise, Chemicals, Bauhaus, sub-programme “Circular Economy and Quality of Life”.

In particular, HERRCO can be considered as an effective partner in projects related to sorting and recycling of packaging and plastic waste (multilayer plastics, etc.), with the objective to demonstrate innovative solutions to recover value-added materials.
